

Project:

1st) User requirement understanding

2nd) Creating [Low-fidelity mockup](#) dashboard

3rd) understanding data source and building logical and physical data model in Tableau

4th) creating dashboard in Tableau

1st) User requirement understanding

User Story | Sales Performance

Intorduction

This user story outlines the specifications for building two dashboards using tableau to help stakeholders, including sales managers and executives to analyze sales performance and customers.

Sales Dashboard | Requirements

Dashboard Purpose

The purpose of sales dashboard is to present an overview of the sales metrics and trends in order to analyze year-over-year sales performance and understand sales trends.

Key Requirements

KPI Overview

Display a summary of total sales, profits and quantity for the current year and the previous year.

Sales Trends

- Present the data for each KPI on a monthly basis for both the current year and the previous year.
- Identify months with highest and lowest sales and make them easy to recognize.

Product Subcategory Comparison

- Compare sales performance by different product subcategories for the current year and the previous year.
- Include a comparison of sales with profit.

Weekly Trends for Sales & Profit

- Present weekly sales and profit data for the current year.
- Display the average weekly values.
- Highlight weeks that are above and below the average to draw attention to sales & profit performance.

2nd) Creating Low-fidelity mockup dashboard

3rd) understanding data source and building logical and physical data model in Tableau
